

# STD/Drug Pamphlets (60 Points)

Will be counted as a test grade and a project grade.

**Goal:** To create an educational pamphlet and a 2-5 minute skit about a STD and a drug.

## Project Information:

Working with a partner, you two will read a fact sheet about an assigned STD or drug and will pull information from it to create a 30 second skit. The criteria for the pamphlet and the skits are located on the back of this sheet. In general you are teaching the class about your STD and drug.

***The idea is to inform students so that they are discouraged from trying the drug or partaking in activity that can lead to an STD.***

## Point Breakdown:

**Script:** 10 points

- Written/typed Script of skit contents (lines for each team)
- Must contain all of the information necessary in the pamphlet
- Scripts will include information from about 1 drug and 1 STD randomly assigned

**Creativity and performance of skit:** 20 points

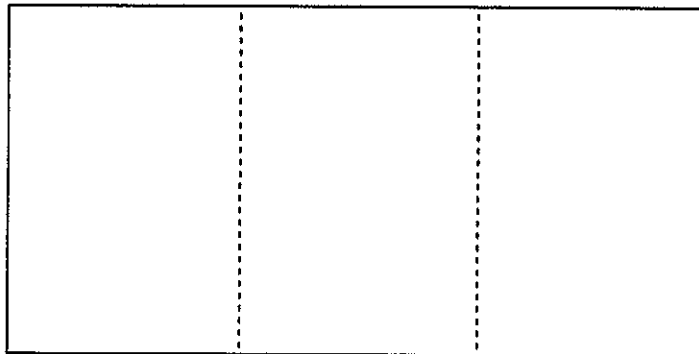

- Can understand the speakers (clear message)
- Interesting skit (entertaining and informative)
- Includes all information necessary for 1 assigned drug and 1 assigned STD

**Pamphlet Information:** 30 points

- Contains all necessary information (located on the back of this sheet)
- Is visually neat and well organized (**Minimum 4 colors/Minimum 1 picture**)
- There are 2 separate pamphlets, 1 for assigned drug and 1 for assigned STD

This is a group project and the idea is to split the work for the pamphlets so that half of your group is working on the drug pamphlet and the other half is working on the STD pamphlet. You should check each other's work and then combine information into your single skit covering both topics.

The pamphlets should be 1 piece of copy paper folded into thirds:

Name \_\_\_\_\_ Topic \_\_\_\_\_

**Information Needed for STD Pamphlet and Skit:**

1. What is your STD? What causes it (virus or bacteria)?
2. How does someone get the disease?
3. What are the symptoms?
4. Are there any cures for it?
5. How can someone prevent themselves from getting this disease?
6. Where can they go for help in the Palm Springs/Cathedral City/Rancho Mirage area?

**Information Needed for Drug Pamphlet and Skit**

1. What is your drug?
2. What kind of effects does this drug have on your body? Why do people like using it?
3. What will happen if someone uses it for a long time? Will they damage their body?
4. Is it possible to die from taking too much of this drug?
5. If someone is hooked on this drug, how can they recover?
6. How can this drug affect a fetus (developing baby)?

**\*\*Each group is responsible for turning in 2 completed pamphlets, 1 script and 1 skit that includes both the assigned drug and the assigned STD.\*\***
